Methodology

I.A.R.I. METHODOLOGY

Interview – SLD will interview relevant key personnel that are knowledgeable about the project to review the technical deliverables for the RFP or project phase. During the interview process key goals will be defined and re-affirmed to establish a clarification process for technical deliverables.

Assessment – SLD will perform an in-depth technical assessment. SLD is interested and concerned about the complete network picture. After the assessment, we will provide written documentation that details your current challenges and issues.

Recommend – After interviewing key personnel, reviewing client documentation and performing an assessment, SLD will make recommendations to the client. This includes a full spectrum of information. Personnel, equipment, and training needs will be addressed to ensure that a functional healthy environment will be implemented. This will ensure that an optimal working environment is achieved and maintained during and after project completion.

Implement – Following the interviews, technical assessment, recommendations and client endorsement, SLD will implement a sound, logical solution that addresses key goals and deliverables with scalability and usability for its client. Full documentation of processes and project review complete the cycle.

Our Mission

Our mission is to supply the best quality solutions to commercial customers and government agencies efficiently with high performance and strategic execution. Our vision is to grow and be a leading Management Consulting firm for the Federal Government and Commercial work space.
